## **Batco Integrated Logistics Pvt Ltd:-**

An Industrial Visit was organized on August 22, 2019 by SIBM-Hyderabad for Operations management students of batch of 2018-2020, as part of their experiential learning of logistics course work and for enhancing their practical knowledge on the processes of container handling, import export and Container Freight Stations (CFS) role in logistics.

## **Company Profile:-**

BATCO Integrated Logistics Pvt Ltd is located in Patancheru, Hyderabad, is a Container Freight Station (CFS). Container Freight Stations (CFS) are the inland extensions of the gateway ports established to facilitate the global business operators of business community with custom clearance services, cargo warehousing, container stuffing / stuffing, carting, bonded warehousing and several other value added services.

BATCO-CFS was established in 2008. Being a relatively new entrant in this segment of logistics industry, BATCO has made rapid progress in CSF business by providing efficient service to its clients

BATCO-CFS has a capacity to handle 1,500 containers (TEUs) per month on a continuous basis supported by an in-house container carting facility

### **Core Business:-**

1. Transit warehousing for imports and export cargo
2. Bonded warehousing
3. Aggregation, palletization and storage for LCL (Less than Container Load) customers

### **Services Provided by Batco:-**

#### **1. Imports:**

- Collecting and transporting of containers from Gateway ports to Hyderabad
- Customs examination and documentation
- De-stuffing of imported cargo
- Logistics support (Only Roadway)
- Bonded warehousing of imported cargo
- Cold zone for temperature sensitive products like pharma

#### **2. Exports:**

- CFS stuffing of containers
- Consolidation of CLS cargo
- Logistics support to gateway ports (Only roadway)
- Preshipment disinfestation of cargo and containers
- Facility to manage refrigerated container

### **Technical Observations at Batco:-**

1. Documentation in imports and exports trade
2. Overlook on the logistics activities conducted by Batco
3. Types of containers, technology and different machinery used for managing the warehouses
4. Handling and storage of containers
5. Cold storage for pharma products and perishables
6. Policies related to auction in concern with containers

7. Maintenance of refrigerated containers and during transit

**Observations by Students:-**

1. Loading and unloading of the containers which have arrived to the CFS.
2. Loading and unloading activates done by machines and man
3. Containers which can maintain required temperature and conditions in it while its being transported
4. Refrigerated containers for air transport
5. Maintenance of cold zone
6. Documentation procedure
7. Safety in container handling

*SIBM-Hyd Faculty felicitating the company mentor Mr. Srinivas, Logistic Manager*

**Conclusion:-**

Visit was very informative and useful for students to see and feel the logistics process, EXIM procedures and documentation processes. It would be useful for everyone at some time in their career.
