Report On Student Immersion Program, Taiwan January 02 – 11, 2019 Topic:- “Introduction to Big Data & A I”

A Report on Student Immersion Program, at Providence University, Taiwan

As a part of Internationalisation initiative, SIBM-H creates opportunities for intellectual growth and knowledge creation and dissemination through international exposure. Student mobility being one among several activities undertaken. The year 2019, started with a student Immersion program in collaboration with Providence University of Taiwan. A 10-day workshop, from January 02 to 11, 2019, was specially designed by Providence University for Indian students. This was in the field of Data Science (Big Data) & Artificial Intelligence (AI). Eight Students were nominated from the Institute based on their merit. This was an excellent way to reinforce their learnings and also get to know of working in international markets work space.

Students at the College of Science, PU

The students got to know about lot of new applications and analytics tool which we can use for interpretation or analysis. As part of the tour we got to learn how we can test Mobile APPs and applications, there was a session on R Language and its applications and as well a session on Financial Data Analytics. Students were taught Applications of AI where they got to learn how automatic production of movies subtitles happens in YouTube.

A local tour to Taichung World Flora Exposition, Sun Moon was arranged. On the final day a project was submitted by the students and both of SIBM teams stood 1st and 2nd in the competition. The Student Immersion Program by Providence

University, Taiwan was a learning experience for all of us which we will surely apply in our future endeavours.
